

CHOOSING THE RIGHT TENT

WHICH STOUT TENT DO I NEED?

Skip to Tent Comparison
Cheat Sheet

SIZE

WALL TYPE

CANVAS

WHAT SIZE TENT DO I NEED?

- 8 ft. 3 in. center pole
- 132 sq. ft. floor space
- 5 ft. entrance
- Fits 2 Twin, 1 queen (sideways behind center pole)

- 9 ft. 9 in. center pole
- 212 sq. ft. floor space
- 5 ft. 6 in. entrance
- Fits 4 Twin, 2 Queen, and 1 King

- 11 ft. 4 in. center pole
- 300 sq. ft. floor space
- 6 ft. entrance
- Fits 6 Twin, 3 Queen, 2 King

5M TENT INTERIORS

We use 5M tents for events. Here are a few examples of how we furnish them.

4M tents are 80 sq. ft. smaller than the 5M and our 6M tent is 88 sq. ft. bigger than the 5M.

One King

Two Twin

Two Queen

One Queen

Three Twin

Two Twin

HOW MUCH GROUND SPACE DO I NEED?

4M

When staking your tent the guy lines extend 4 - 4 1/2 ft., bringing the total space needed to set up the tent to **min 18 ft. x 18 ft.**

5M

When staking your tent the guy lines extend 4 - 4 1/2 ft., bringing the total space needed to set up the tent to **min 20 ft. x 20 ft.**

6M

When staking your tent the guy lines extend 4 - 4 1/2 ft., bringing the total space needed to set up the tent to **min 25 ft. x 25 ft.**

THINGS TO CONSIDER WHEN IT COMES TO SIZE

How long will my tent be set up?

Bigger Isn't Always Better

- A bigger tent = more canvas and more weight on your poles and anchor points.
- Added weight can rip and tear more easily when exposed to harsher elements like snow and wind for a long period of time.

Is there harsh weather where I am planning to camp?

Height Matters

- A smaller tent = a shorter doorway and less standing space inside.
- The 4M tent entrance is 5 ft. tall with an 8 ft. center pole, which means most adults will have to bend down to get in/out of the tent.

Will my tent be closely monitored or setup on its own?

Will I be putting a mattress or large furniture inside my tent?

DO I NEED SINGLE WALL OR DOUBLE WALL?

"Single wall" refers to the 2 ft. high canvas sidewall that surrounds the perimeter of your tent. You can keep your canvas sidewall zipped tight to the tent floor like this (option 1):

OR

"Double wall" refers to the secondary mesh sidewall underneath your canvas sidewall. With double wall tents you have three sidewall options. You can leave both layers down (option 1), roll up both layers (option 2) or leave the mesh layer down and roll up the canvas layer (option 3) like this:

1

roll up the sidewall and toggle it to the tent roof for breathability and easy cleaning like this (option 2):

2

3

Roll up both sidewall layers for easy cleaning (option 2) or keep the mesh layer down to let in the breeze, but not the bugs (option 3).

THINGS TO CONSIDER WHEN IT COMES TO SIDEWALL OPTIONS

Is it humid where I will be camping?

Fewer Options = Less Setup/ Teardown Time

- Rolling up/ down a secondary mesh wall adds an extra step to the setup and teardown process. That extra few minutes can add up when setting up and tearing down several tents. Many pop-up event owners opt for single wall tents for this reason.

Are there a lot of bugs where I will be camping?

More Options = Suitable for More Environments

- Double wall tents are adaptable to warm and cool climates and good for transitioning from day to night.
- A mesh sidewall promotes air-flow and ventilation, which helps prevent condensation and mold from forming. This is particularly useful in humid climates.
- A mesh wall keeps the bugs out.

Will I be camping in different locations or at different times of the year?

Am I setting up multiple tents for a short period of time (eg. for an event)?

WHICH TENT MODEL IS BEST FOR ME?

We offer three bell tent models that are made with slightly different canvas and features. We have something for everyone!

THE ULTIMATE

THE PRO

**THE
OVERLAND SUNFOREGER**

ALL STOUT TENTS FEATURE:

- 100% natural, waterproof canvas
- Professional-grade thread & stitching
- Rip-stop, zip-in, PVC groundsheet- tub style
- 24" sidewalls that roll up
- Double wall option - mesh wall for keeping bugs out when your sidewall is rolled up
- One center pole
- Large A-frame doorway with secondary mesh door
- Reflective guylines and metal sliders
- Rebar stakes
- Stainless steel D-rings that don't rust or break like grommets
- Power cord pass-throughs

Your tent will arrive in a single package with a reusable canvas bag roughly the size of a golf bag. It can be setup by one person in about 15 min. Of course, there is a learning curve for new tent owners.

Tough

THE ULTIMATE

- Best entry-level tent
- Single-weave canvas: 8.6-oz /285 gsm
- Available in 4M & 5M
- Tough tent, but at a recreational weight
- Not recommended for long-term use - lighter-weight canvas doesn't fair well with the cleaning and maintenance that a long term setup requires
- Popular with glampers, festival goers, party planners, backyard hosts, and professionals looking to level up their expo booths and presentations

Tougher

THE PRO

- Top-of-the-line, all-season tent
- Single-weave canvas; 10.06 oz./340 gsm
- Available in 4M, 5M, 6M, and 5M Pro Stargazer
- Better suited for long-term use- heavier canvas provides more coverage against the elements and is very resistant to UV rays
- Maintenance considerably easier than the Ultimate- canvas can take up to 70psi from a pressure washer
- Popular with pop-up event companies, vacation rental owners, and serious campers
- Comes with 3"-6" adjustable stove jack
- Fire retardant
- Double-door option (6M Pro and Stargazer)

THE OVERLAND SUNFORGER

Toughest

- True basecamp tent
- Tight double-weave canvas: 10.10 oz./340 gsm
- Available in 5M
- Toughest tent- made with military-grade, duck canvas, entirely double-stitched, with triple reinforced pressure points, YKK #10 door zippers
- Well suited for long-term setups- double-weave canvas offers protection in high-humidity and high-moisture environments
- Thickest and heaviest canvas good for cleaning, but is less breathable than the single-weave used in our Ultimate and Pro series
- Popular with hunters, long-term commercial site owners, and anyone planning to brave nature's elements!
- Comes with 3 in.-6 in. adjustable stove jack
- Fire retardant

THINGS TO CONSIDER WHEN IT COMES TO TENT MODELS

Heavy-duty Canvas = Added Weight

- The Overland Sunforger's heavy-duty canvas is very resistant to extreme weather. Many retreat owners opt for the Sunforger for this reason.
- Glamping Oasis, Collective Retreats, uses over 100 Sunforgers for guest accommodations in locations across the country.

Super Tough isn't Always Necessary or Best

- The Sunforger's heavy-duty canvas is well, heavy. As such it is not usually the best choice for event owners who are repeatedly setting up and tearing down their tents for events.
- Event owners usually opt for one of our Pro tents because of their durability, lighter weight, and size/feature options.
- The Ultimate is lightweight and easy. Great for recreational campers.

Will I be setting up multiple tents in multiple locations (eg. events)?

Do I need my tent to withstand extreme weather conditions?

Am I using my tent for personal use (eg. family camping trip)?

Will I be using my tent as a semi-permanent structure for an extended period of time (eg. camping resort/vacation rental)?
